

Digital Solutions for Learning Institutions to be Featured by BMI Imaging at CASBO California Conference

BMI to highlight solutions that help California schools and staff become more efficient by reducing records management and retrieval costs; two unique microfilm scanning solutions, Digital ReeL and ScanPro, to be demonstrated

Sacramento, California – March 6, 2014 - BMI Imaging Systems, a leading provider of [California document management solutions for educational institutions](#), announced today that it will be attending the California Association of School Business Officials (CASBO) Conference in April.

CASBO is a nonprofit organization made up of thousands of school business leaders. It is the source for professional development in all California K-14 business disciplines. Members stay current on school news, attend training and certification classes and advocate on behalf of California's K-14 school systems. The CASBO Annual Conference is the single largest gathering of California school business officials.

BMI Imaging will be demonstrating document management solutions that help educational institutions digitally convert their paper and microfilm records. Example record types include transcripts, student records, admissions, school board minutes, student billing and HR records.

BMI will also be demonstrating two of its unique microfilm scanning solutions, Digital ReeL and the ScanPro 3000. Digital ReeL is a [microfilm scanning solution for schools](#) that creates a digital replica of microfilm, presenting users an online viewer that looks like a reader. Global text-search and adjustable grayscale image enhancement unlocks the full potential of student records. ScanPro 3000 is a [microfilm scanner available to California educational institutions](#). The ScanPro 3000 brings Ultra High Definition scanning to microfilm, allowing users to create high-quality archival digital images from all forms of microfilm.

BMI Imaging regularly works with K-12, school districts, junior colleges, trade schools and universities to empower schools to become more efficient, make better informed decisions and focus more resources on student achievement.

Stop by BMI Imaging's CASBO booth (#1025) to learn more about our document management solutions for educational institutions.

About BMI Imaging

BMI has been a leader in document management services, microfilm scanning and microfiche conversion services for over 50 years. BMI staff consists of nearly 100 employees, many who have been with BMI for decades. We convert an average of 3 million images per month. BMI serves commercial and government agencies throughout the United States and has developed a customer list of more than 2,000 accounts, some of which we have served for more than 20 years. This customer loyalty stems from our consistent, high-quality and customized service. BMI is headquartered in Sunnyvale, California, with an additional production and sales facility in Sacramento.
